

POSITIVE DISPLACEMENT FLOW METERS AND ACCESSORIES

www.vermonttechnologies.co.in

• Measurement • Tank Safety • Transfer • Control

Applications

Truck Mounted Metering

- Aviation Fuel
- Refined Fuels
- Lube Oils & Additives
- LPG

Terminal/Depot Metering

- Refined Petroleum Products
- Solvents/Chemicals
- Marine Fuel Oil

Industrial Process Metering

- Industrial Liquids
- Barrel Filling
- Batching/Blending
- Dispenser Metering

Others

- Ship Bunkering and Barge Loading
- Rail Wagon Loading
- Railway Consumer Depot (RCD)

About Us

Vermont Technologies is engaged in manufacture and supply of reliable, high accuracy Positive Displacement (P.D.) flow metering systems. All meters are designed to provide the highest performance in flow measurement, meeting international custody transfer measurement standards. These meters are designed for use with a variety of liquids. Each meter is fully tested and calibrated at our manufacturing facility before dispatch.

Design Features

- Conformation to custody transfer accuracy
- Can handle wide range of Viscosity of liquids.
- Modular construction ensures interchangeable parts, lower inventory of spares and ease of service.
- Bi-directional flow.
- Low pressure drop.
- Mechanical or Electronic readout.

Your Liquid Assets Manager

Unique Designs of P.D. Meter by Vermont

Tri-Rotor

Rotary Vane

Oval Gear

Accuracy: $\pm 0.1\%$
Repeatability: 0.02%

Meters

Vermont P.D. meters are used for wide range of applications. From Truck mounted application to Refinery Terminals and refined Petroleum products to Industrial chemicals.

Truck Meters

Vermont Taurus Series P.D. Meters which are available in (40mm/50mm) sizes are widely used as Truck Meter. These provide proven performance and have Weights & Measures approval. These could be provided with Mechanical or Digital readout with Printer facility

Meter with Batch Controller on LPG Truck

Process Batching Meters

Vermont Meters are also widely used for industrial process batching Applications. This includes barrel filling, blending, batching of Various industrial liquids. Typical process Batching meter consists of P.D. flow meter with preset Register and Mechanical Shut off valve. P.D. Meters can also be offered in Electronic configuration, with pulse output and batch controllers Configured with Digital Control Valve.

Meter with Digital Display

1" Leo Series Flowmeter with BCU

Meter on Refueller or Bowser

Size	Flow Range upto (LPM)	Material of Construction	Working Pressure (PSI)
1 1/2"	70 / 250	Alum. Alloy / Cast Steel / SS	150
2"	250 / 550	Alum. Alloy / Cast Steel / SS	150 / 300
3"	1200	Alum. Alloy / Cast Steel / SS	150 / 300
4"	2200	Alum. Alloy / Cast Steel / SS	150 / 300
6"	3000	Alum. Alloy / Cast Steel / SS	150 / 300
8"	5500 / 6000	Alum. Alloy / Cast Steel / SS	150 / 300

- Single and Double case options
- Optional High temperature configuration
- Different flange orientations
- Suitable different viscosity ranges

Loading Terminal Meters

The larger sizes (3" & above) TL and Taurus series meters are ideal for load rack, rail wagon, barges applications and more. These meters are available in Single Case as well as Double Case construction, to suit wide range of applications and flow capacities. They provide unmatched accuracy and trouble free operation over long period of use.

Meters can be fitted with mechanical Veeder Root products or with Electronic Batch Controllers and Digital Control Valve.

3" Meter with Pulse Output

3" Mechanical Preset Package

8" Meter with Pulse Output

Electronic Batch Controller
in Oil Terminal Loading Application

Master Meter Calibration Skid

Metering Skids

Vermont can offer custom built metering skids. Metering skids can be designed with PD/Mass /Turbine Meters as per various International Standards. From design, engineering, manufacture, fabrication, to testing and calibration. The skid systems are designed to suit customer requirements, which may accommodate all necessary equipments including strainers, air eliminators, pumps, valves and flow computers etc. The skid is cabled, assembled, and tested in the factory and then delivered to the destination.

Accessories

Strainer and Air Eliminator (SAE)

Vermont can offer the combination of Line Strainer cum Air Eliminator. It ensures removal of solid impurities, air or vapor from the liquids before they enter the meter. Vermont offers 1 ½" to 24" size SAE designed in accordance

Bulk Air Eliminators (Air Separators)

The Vermont Bulk Air Eliminators (BAE) separate and release air or gas from petroleum or other liquids from the pipeline. BAEs are designed and offered to suit number of applications such as Marine fuel bunkering, cross country pipelines, Oil Terminals and Depots. Typically BAE's, form sizes 3" onwards upto 36", handling host of different products.

Digital Control Valves

Vermont Digital Control Valve is designed to provide precise Flowrate control and preset batch when used with Batch Controller. Vermont offers two types of Valve - Diaphragm and Piston. These valves are provided with host of accessories like built in strainer, needle valve, locking device, stem switch. These valves offer an in-built flow governing function.

Batch Controller Unit (BCU)

Vermont BCU's for loading provides Custody Transfer loading control. It can operate in 'Manual' or 'Auto' mode. It has been designed to perform various batch loading applications. It can be configured to single loading arm or Dual control. It offers modular design and has provision made for additional expansion.

Counters

Vermont can offer Veeder Root and Vermont Counters for volume indication, 5 digit large numerical reset with 8 digit non-reset totaliser. Liters, Dekaliters, Gallons indication. Apart from Counter, Vermont offers Veeder Root and Vermont Registers for pre-determined volume of precise batch control. Additionally, Vermont Flow Meters are also compatible with Veeder Root EMR4 Electronic display counter with remote indication, 4-20 mA output, data logging facility. Ticket Printers can also be integrated into the system to provide an imprinted ticket for delivery transaction - Accumulative or Zero start options are available.

Proving Skids and Systems

The tank Prover systems are designed and manufactured in accordance with Legal Metrology regulations. These provers can be Static or Trolley mounted, available in different capacities. Proving Skids are also designed as per customer's specific requirements, which may include flow computer, prover tanks, pump & motor, set of valves, master meter and other equipments.

Vermont Flow Metering Solutions for you

Come to a company, you can trust and experience the VERMONT difference

To find out more about what we can do for you, visit our website
